

Tap "Settings"
for several
times.

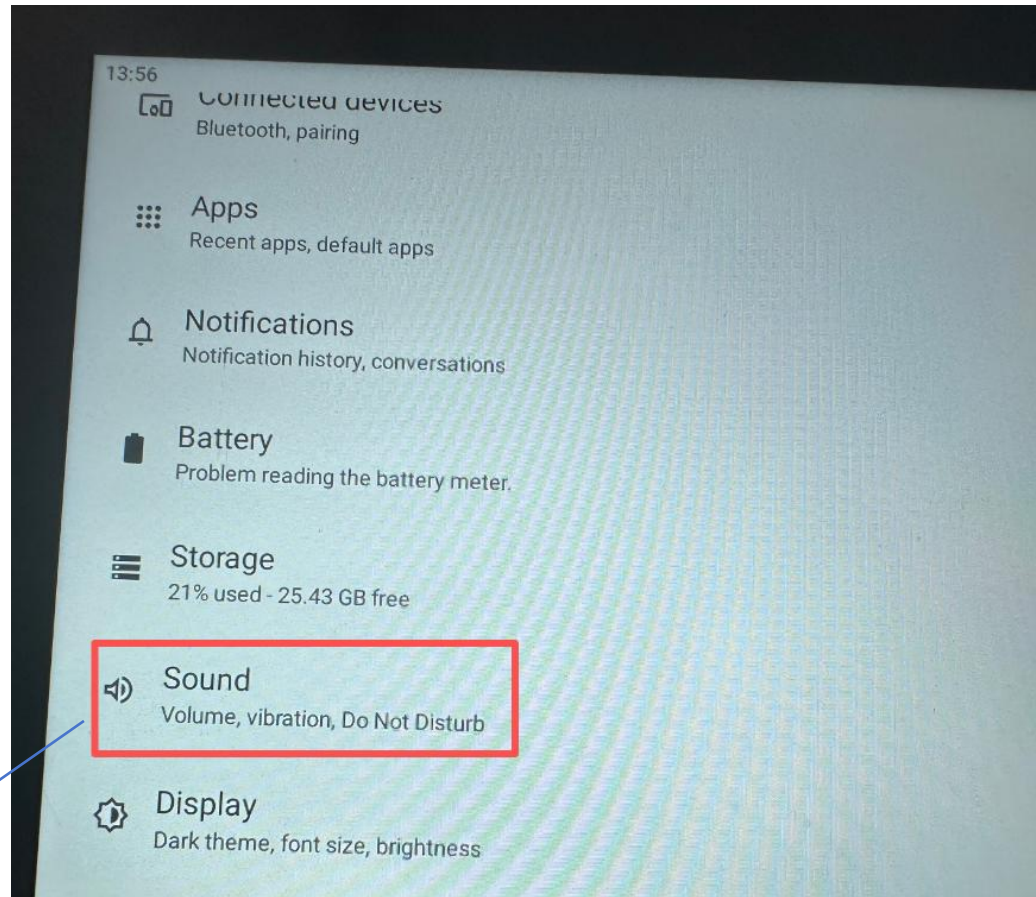

Enter password
"008638" to
the engineer page

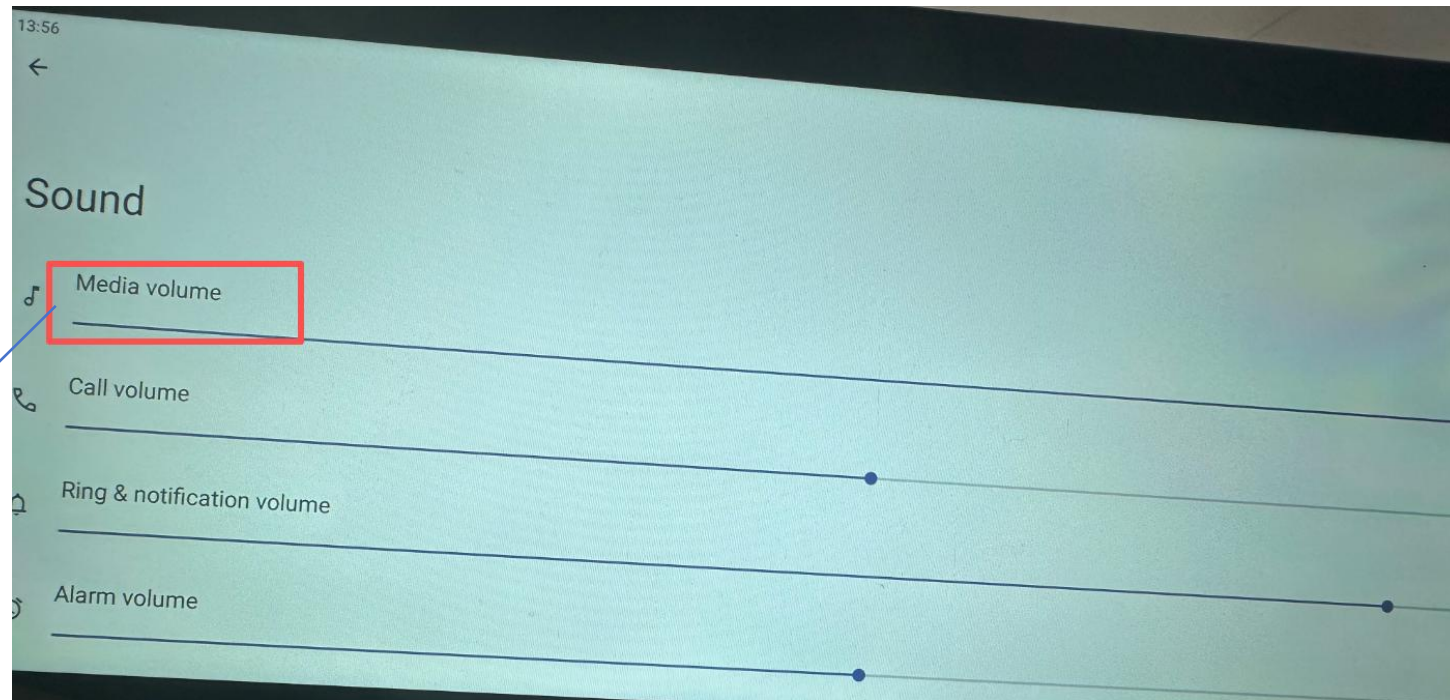

Find "System Settings" in the engineering mode and tap it.

Find "Sound" and tap it.

Find “Media volume”
and adjust the volume
to be the highest.

After completing these steps, please turn back and find “APPs” and find “Open”, then tap “Open”. The tablet controller will be turned off. The customer needs to turn off the power switch to be “O” from the back of the chair and turn the power switch on to be “I” again and turn on the tablet controller. Then try to see if the volume has been the loudest.
